Preface for Instructors and Other Teachers	xvii
1 About This Book	xvii
2 How to Use This Book	xx
2.1 A Start on Discovery-Based Learning	xxi
2.2 Details of Conducting Group Work	xxiii
3 Chapter (and Bonus-Section) Sequencing and Dependencies	xxvi
Preface for Students and Other Learners	xxix
1 About This Book (and about Learning Mathematics)	xxix
2 How to Use This Book	xxx
2.1 How to Use This Book in a Class	xxxii
2.2 How to Use This Book for Self-Study	xxxii
3 Tips for Reading Mathematics	xxxiii
4 Problem-Solving Prompts	xxxv
5 Tips for Writing Mathematics	xxxv
Acknowledgments	xxxix
I Theme: The Basics	1
1 Counting and Proofs	3
1.1 Introduction and Summary	3
1.2 Try This! Let's Count	3
1.3 The Sum and Product Principles	6
1.4 Preliminaries on Proofs and Disproofs	9
1.5 Pigeons and Correspondences	14
1.6 Where to Go from Here	20
1.7 Chapter 1 Definitions	20
1.8 Bonus Check-Yourself Problems	21
1.9 Problems That Use Counting or Proofs	22
1.10 Instructor Notes	25

2	Sets and Logic	27
2.1	Introduction and Summary	27
2.2	Sets	28
2.2.1	Making New Sets from Scratch	29
2.2.2	Finding Sets inside Other Sets	30
2.2.3	Proof Technique: Double-Inclusion	31
2.2.4	Making New Sets from Old	32
2.2.5	Looking at Sets	33
2.3	Logic	37
2.3.1	Combining Statements	38
2.3.2	Restriction of Variables via Quantifiers	42
2.3.3	Negation Interactions	44
2.4	Try This! Problems on Sets and Logic	46
2.5	Proof Techniques: Not!	47
2.6	Try This! A Tricky Conundrum	50
2.7	Additional Examples	50
2.8	Where to Go from Here	53
2.9	Chapter 2 Definitions	54
2.10	Bonus: Truth Tellers	56
2.11	Bonus Check-Yourself Problems	59
2.12	Problems about Sets and Logic	60
2.13	Instructor Notes	62
3	Graphs and Functions	65
3.1	Introduction and Summary	65
3.2	Function Introduction	65
3.3	Try This! Play with Functions and Graphs	72
3.3.1	Play with Functions	72
3.3.2	Play with Graphs	72
3.3.3	A Dot Game	74
3.4	Functions and Counting	75
3.5	Graphs: Definitions and Examples	75
3.6	Isomorphisms	80
3.7	Graphs: Operations and Uses	83
3.7.1	Sets and Graphs Have Some Things in Common	83
3.7.2	How Are Graphs Useful?	84
3.8	Try This! More Graph Problems	86
3.9	Ramseyness	88
3.10	Where to Go from Here	89
3.11	Chapter 3 Definitions	91
3.12	Bonus: Party Tricks	93
3.13	Bonus 2: Counting with the Characteristic Function	94

3.14	Bonus Check-Yourself Problems	95
3.15	Problems about Graphs and Functions	96
3.16	Instructor Notes	100
4	Induction	103
4.1	Introduction and Summary	103
4.2	Induction	103
4.2.1	Summation Notation	109
4.2.2	Induction Types and Styles	111
4.3	Try This! Induction	112
4.4	More Examples	113
4.5	The Best Induction Proof Ever	115
4.6	Try This! More Problems about Induction	116
4.7	Are They or Aren't They? Resolving Grey Ducks	117
4.8	Where to Go from Here	118
4.9	Bonus: Small Crooks	118
4.10	Bonus 2: An Induction Song	120
4.11	Bonus Check-Yourself Problems	120
4.12	Problems That Use Induction	121
4.13	Instructor Notes	124
5	Algorithms with Ciphers	127
5.1	Introduction and Summary	127
5.2	Algorithms	127
5.2.1	Conditionals and Loops	130
5.2.2	Efficiency	135
5.2.3	Algorithms and Existence Proofs	136
5.3	Modular Arithmetic (and Equivalence Relations)	137
5.4	Cryptography: Some Ciphers	142
5.4.1	Shift Ciphers	143
5.4.2	The Vigenère Cipher	144
5.4.3	Decryption and the Real World	147
5.5	Try This! Cryptoequivalent Modular Algorithmic Problems	148
5.6	Where to Go from Here	149
5.7	Chapter 5 Definitions	151
5.8	Bonus: Algorithms for Searching Graphs	152
5.9	Bonus 2: Pigeons and Divisibility	154
5.10	Bonus Check-Yourself Problems	157
5.11	Problems about Algorithms, Modular Arithmetic, and Ciphers	158
5.12	Instructor Notes	161

Theme I Supplement	163
TI.1 Summary of Theme I Proof Techniques	163
TI.2 Potential Practice Proof Problems	166
TI.2.1 Problems Pertaining to Chapter 1	166
TI.2.2 Problems Pertaining to Chapter 2	166
TI.2.3 Problems Pertaining to Chapter 3	167
TI.2.4 Problems Pertaining to Chapter 4	168
TI.2.5 Problems Pertaining to Chapter 5	168
TI.3 Problems on the Theme of the Basics	169
II Theme: Combinatorics	173
6 Binomial Coefficients and Pascal's Triangle	175
6.1 Introduction and Summary	175
6.2 You Have a Choice	175
6.3 Try This! Investigate a Triangle	178
6.4 Pascal's Triangle	180
6.5 Overcounting Carefully and Reordering at Will	182
6.6 Try This! Play with Powers and Permutations	186
6.7 Binomial Basics	187
6.8 Combinatorial Proof	190
6.9 Try This! Pancakes and Proofs	191
6.10 Where to Go from Here	193
6.11 Chapter 6 Definitions	194
6.12 Bonus: Sorting Bubbles in Order of Size	194
6.13 Bonus 2: <i>Mastermind</i>	197
6.13.1 One Strategy for Playing	198
6.13.2 Mini-Project	200
6.14 Bonus Check-Yourself Problems	202
6.15 Problems Binomially Combinatorial in Nature	203
6.16 Instructor Notes	206
7 Balls and Boxes and PIE: Counting Techniques	207
7.1 Introduction and Summary	207
7.2 Combinatorial Problem Types	207
7.3 Try This! Let's Have Some PIE	214
7.4 Combinatorial Problem Solutions and Strategies	215
7.4.1 Strategy: Slots	215
7.4.2 Strategy: Stars and Bars	216
7.4.3 Solutions to Problem Types	218
7.4.4 Denouement: Bijective Counting, Again	223

7.5	Let's Explain Our PIE!	225
7.6	Try This! What Are the Balls and What Are the Boxes? And Do You Want Some PIE?	230
7.7	Where to Go from Here	231
7.8	Chapter 7 Definitions	232
7.9	Bonus: Linear and Integer Programming	232
7.10	Bonus Check-Yourself Problems	237
7.11	Problems about Balls, Boxes, and PIEs	238
7.12	Instructor Notes	243
8	Recurrences	245
8.1	Introduction and Summary	245
8.2	Fibonacci Numbers and Identities	245
8.3	Recurrences and Integer Sequences and Induction	248
8.4	Try This! Sequences and Fibonacci Identities	253
8.5	Naive Techniques for Finding Closed Forms and Recurrences	255
8.6	Arithmetic Sequences and Finite Differences	256
8.7	Try This! Recurrence Exercises	259
8.8	Geometric Sequences and the Characteristic Equation	260
8.9	Try This! Find Closed Forms for <i>These</i> Recurrence Relations!	266
8.10	Where to Go from Here	266
8.11	Chapter 8 Definitions	267
8.12	Bonus: Recurring Stories	268
8.13	Bonus Check-Yourself Problems	272
8.14	Recurring Problems	273
8.15	Instructor Notes	275
9	Cutting Up Food: Counting and Geometry	277
9.1	Introduction and Summary	277
9.2	Try This! Slice Pizza (and a Yam)	277
9.3	Pizza Numbers	280
9.4	Try This! Spaghetti, Yams, and More	282
9.5	Yam, Spaghetti, and Pizza Numbers	284
9.5.1	Let's Go for It! Hyperbeet Numbers	287
9.6	Where to Go from Here	289
9.7	Chapter 9 Definitions	290
9.8	Bonus: Geometric Gems	290
9.9	Bonus Check-Yourself Problems	293
9.10	Problems That Combine Combinatorial Topics	294
9.11	Instructor Notes	297
	Theme II Supplement: Problems on the Theme of Combinatorics	301

III	Theme: Graph Theory	307
10	Trees	309
10.1	Introduction and Summary	309
10.2	Basic Facts about Trees	309
10.3	Try This! Spanning Trees	312
10.4	Spanning Tree Algorithms	314
10.4.1	Greedy Algorithms	323
10.5	Binary Trees	324
10.6	Try This! Binary Trees and Matchings	330
10.7	Matchings	332
10.8	Backtracking	333
10.9	Where to Go from Here	336
10.10	Chapter 10 Definitions	336
10.11	Bonus: The Branch-and-Bound Technique in Integer Programming	337
10.12	Bonus Check-Yourself Problems	339
10.13	Tree Problems	340
10.14	Instructor Notes	345
11	Euler's Formula and Applications	347
11.1	Introduction and Summary	347
11.2	Try This! Planarity Explorations	347
11.3	Planarity	349
11.4	A Lovely Story	350
11.5	Or, Are Emus Full?: A Theorem and a Proof	352
11.6	Applications of Euler's Formula	354
11.7	More Planarity-ish Examples	358
11.8	Try This! Applications of Euler's Formula	359
11.9	Where to Go from Here	360
11.10	Chapter 11 Definitions	361
11.11	Bonus: Topological Graph Theory	361
11.12	Bonus Check-Yourself Problems	364
11.13	Problems about Planar Graphs	365
11.14	Instructor Notes	368
12	Graph Traversals	371
12.1	Introduction and Summary	371
12.2	Try This! Euler Traversals	371
12.3	Euler Paths and Circuits	373
12.4	Dijkstra's Algorithm, with sides of Hamilton Circuits and the Traveling Salesperson Problem	377
12.5	Try This!—Do This!—Try This!	382

12.6	Two More Examples	383
12.7	Where to Go from Here	384
12.8	Chapter 12 Definitions	385
12.9	Bonus: Digraphs, Euler Traversals, and RNA Chains	385
12.10	Bonus 2: Network Flows	388
12.11	Bonus 3: Two Hamiltonian Theorems	392
12.12	Bonus Check-Yourself Problems	394
12.13	Problems with Traversing	395
12.14	Instructor Notes	401
13	Graph Coloring	403
13.1	Introduction and Summary	403
13.2	Try This! Coloring Vertices and Edges	403
	13.2.1 Vertex Coloring	403
	13.2.2 Edge Coloring	404
	13.2.3 More on Vertex Coloring	405
	13.2.4 More on Edge Coloring	405
13.3	Introduction to Coloring	406
	13.3.1 Coloring Bounds	409
	13.3.2 Applications of Vertex Coloring	411
13.4	Try This! Let's Think about Coloring	415
13.5	Coloring and Things (Graphs and Concepts) That Have Come Before	417
	13.5.1 Let's Color the Edges of Complete Graphs	417
	13.5.2 Let's Color Bipartite Graphs	418
	13.5.3 Add a Condition, Get a Different Bound	420
	13.5.4 Greedy Matchings	421
13.6	Where to Go from Here	423
13.7	Chapter 13 Definitions	423
13.8	Bonus: The Four-Color Theorem	424
13.9	Bonus Check-Yourself Problems	429
13.10	Colorful Problems	430
13.11	Instructor Notes	434
	Theme III Supplement: Problems on the Theme of Graph Theory	435
IV	Other Material	443
14	Probability and Expectation	445
14.1	Introduction and Summary	445
14.2	What <i>Is</i> Probability, Exactly?	446
14.3	High Expectations	448

14.4	You Are Probably Expected to Try This!	454
14.5	Conditional Probability and Independence	455
14.5.1	The Helpfulness of PIE in the Real World of Probability	459
14.5.2	Independence versus Exclusivity	461
14.6	Try This! , Probably, Under Certain Conditions	463
14.7	Higher Expectations	464
14.7.1	That's <i>Wild!</i> (A Hint at the Probabilistic Method)	466
14.8	Where to Go from Here	468
14.9	Chapter 14 Definitions	469
14.10	Bonus: Ramsey Numbers and the Probabilistic Method	470
14.11	Bonus Check-Yourself Problems	473
14.12	Expect Problems, Probably	475
14.13	Instructor Notes	480
15	Fun with Cardinality	481
15.1	Introduction and Summary	481
15.2	Read This! Parasitology, the Play	481
15.2.1	Scene 1: The Storage Coordinator	482
15.2.2	Scene 2: The Taxonomist	486
15.2.3	Scene 3: The Café	489
15.2.4	Scene 4: Cataloguing	494
15.3	How Big Is Infinite?	497
15.4	Try This: Investigating the Play	497
15.4.1	Questions about Sample Storage	497
15.4.2	More Questions about Sample Storage	499
15.4.3	Questions about Café Conversations	499
15.4.4	Indiscrete Questions	501
15.5	How High Can We Count?	502
15.5.1	The Continuum Hypothesis	505
15.6	Where to Go from Here	505
15.7	Chapter 15 Definitions	506
15.8	Bonus: The Schröder–Bernstein Theorem	506
15.9	Bonus Check-Yourself Problems	508
15.10	Infinitely Large Problems	508
15.11	Instructor Notes	510
16	Number Theory	511
16.1	Introduction and Summary	511
16.2	Try This! Divisors and Congruences	511
16.2.1	Phi, Phi, Pho, Phum	511
16.2.2	Getting More out of Prime Factorizations	512
16.2.3	Back to φ : More Phi, Less Pho and Phum	513

16.3	Computing the GCD	513
16.4	Try This! Congruence Experiments	515
16.5	Counting with Congruence Equations	516
16.5.1	Just One	517
16.5.2	Two at Once	518
16.5.3	Computing $\varphi(n)$	518
16.6	Try This! Investigate Freaky Fraction Lists	521
16.7	Mysterious Mediants	522
16.8	Where to Go from Here	524
16.9	Chapter 16 Definitions	524
16.10	Bonus: The RSA Cryptosystem	525
16.11	Bonus Check-Yourself Problems	529
16.12	Problems on Number Theory Topics	529
16.13	Instructor Notes	531
17	Computational Complexity	533
17.1	Introduction and Summary	533
17.2	Try This! Count the Operations	533
17.3	Computation of Runtime Functions	536
17.3.1	Challenges in Measuring Complexity of Algorithms	536
17.3.2	Why This Matters	538
17.3.3	What <i>Is</i> a Runtime Function?	539
17.4	Try This! Compute Runtime Functions	542
17.5	Comparing Runtime Functions	543
17.5.1	Big-O (and Ω and Θ) Notation	547
17.6	Try This! Determine Complexity Classes	550
17.7	Where to Go from Here	551
17.8	Chapter 17 Definitions	552
17.9	Bonus Check-Yourself Problems	552
17.10	Computation Problems	553
17.11	Instructor Notes	558
A	Solutions to Check Yourself Problems	559
B	Solutions to Bonus Check-Yourself Problems	593
C	The Greek Alphabet and Some Uses for Some Letters	641
D	List of Symbols	643
	Bibliography	647
	Index	649
